Arena On Course for Ryder Cup 2018

[Arena Group](#), European event supplier, is currently on course at Le Golf National course in Paris, France, installing event scaffolding as the first phase of a contract to supply [Ryder Cup 2018](#), September 25 – 30.

Arena has once again been entrusted by Ryder Cup to install event infrastructure, extending a relationship that spans over 20 years. Every two years the tournament sees teams comprised of Europe and the USA's leading golfers contest the prestigious trophy, alternating between Europe and the US.

Ryder Cup match director Edward Kitson says:

“This is the first time the Ryder Cup has been hosted in mainland Europe, rather than the United Kingdom. It is reassuring to know that we have our trusted supplier Arena on board as we look forward to bringing Ryder Cup to Paris, underpinning the delivery of a spectacular tournament.”

Arena Scaffolding was one of the first event suppliers on site, from 9th April, to begin the installation of over 12,500sqm of scaff sub-structures, temporary bridges, walkways, steps, timber walls and cladding.

Arena will also be providing temporary structures and event furniture to support the organiser's vision of producing a truly world class golf event for the players, live spectators and vast TV audience.

Grahame Muir, CEO Arena UK & Europe, comments:

“Arena has a long and cherished pedigree of supporting golf events throughout the world. The Ryder Cup is a very special event and one that the entire team at Arena really look forward to working on. Uniquely Arena is contracted to deliver both the UK and US legs of this tournament. We have an ever increasing inventory of equipment to ensure we can achieve and exceed the challenges and aspirations of the Ryder Cup staging team. We look forward to transforming this golf course into stunning event space.”
