INSPIRING PLAYGROUND & SPORT COURTS

- Fast and easy!

With Bergo's SPORT floor tiles one can transform a sportstrack, schoolyard, an event etc. into an inspiring play area in a few hours.

Bergo Multisport floor tiles opens up for game! Football, hockey, inline hockey, handball, basketball, tennis, general play, etc.

Large areas can very quickly be transformed since the floor is easy to lay—with only a rubber hammer.

One can create lines and zones in different colours. Colour and shape of the court attracts!

The floor has a perforated pattern that allow rain to drain away and the ground is softer than concrete or asphalt to provide the bounce and friction needed for e.g. ball games. 100s of outdoor courts have been installed worldwide and references are available from several municipalities in the country.

Bergo Flooring has been manufacturing multi-functional floor tiles since 1972 and is the world market leader in this field. The award-winning floor has undergone several tests and is specifically developed for five different business areas: HOME, PUBLIC, EVENT, SPORT and MARINE.
