

Daplast has supplied CRM and CR5 stadium seats at this stadium

Daplast renowned for its excellence in developing custom based projects and installation facilities is a leader in supplying stadium seats around the world. With more than 30 years of experience, Daplast installed a record number of 2,000,000 seats in 1,500 premises and above, starting off from small rooms to large stadiums.

The supplier of 10 distinct types of seats in various models, Daplast have installed seats in many sports stadiums world wide. Now it is all set to flaunt its CRM and CR5 models seats which were recently installed at 5 July Stadium Alger.

The 5 July Stadium of Algiers is an Olympic stadium opened in 1972. This is a historical Stadium and getting ready to welcome the final football Cup of Algeria 2015 after renovations. It's appearance is expected to be more intriguing, as it was installed with Daplast seats CRM and CR5 models with metal brackets stand against type. These seats

are resistant to the action of UV feature very important for the climatic conditions of the region.

Daplast technicians visited the stadium to assist and train the workers in the first steps of the stadium seats installation process.

With this renovation, the stadium will increase its people capacity and provide cherishing experience to the spectators.

As stated last 22 March the Minister of Housing, Urban Development and the City, Abdelmadjid Tebboune, Algeria opens the doors of its modernized stadium for the final phase of National Cup Football to be held on May 2 in the Algerian capital.
