

## **Press release**

### **Kiev Olympic Stadium**

The stadium was initiated in 1914 and has seen an eventful and even turbulent history of construction, demolition and reconstruction. After modernisation for EM 2012 it now offers space for about 70 000 visitors.

Kaba's Ukrainian partner Transexpo has installed 54 FTS-L02 turnstiles for a safe and secure access of the public. These turnstiles feature a night closure to provide a good perimeter security and avoid vandalism. On 8<sup>th</sup> October 2011 the stadium was opened with a big celebration in which international stars like Shakira and Vladimir Klitschko participated. The first football match in the new stadium on 11<sup>th</sup> November 2011 ended in a draw between the national teams of Ukraine and Germany.
