

CUSTOMISED SPORTS AND RECREATIONAL FLOORING WITH STYLEMAKER

FROM DESIGN VIA APP TO READY-TO-INSTALL BLUEPRINT

With the aid of creative floor images, playgrounds and recreational floorings can be transformed into appealing themed worlds. Whether animals, floor games, geometric shapes, numbers and letters or even personalised logos: Installers knowing how to professionally integrate these images frequently secure an important lead in tenders and sales dialogues.

With the Stylemaker® coming in 2018, even complex floor designs can be realized in an easy, fast and efficient way. The product app will be launched on the market just in time for the new season. With the aid of the product app, a planned floor installation can be planned in a very easy and professional way.

First of all, the floor space to be designed is defined by entering the dimensions of the planned project in the app. After that, stored images from various themed floor worlds can be selected and virtually positioned on the floor space. The individual images can be randomly combined with each other; they can be moved, flipped, and zoomed in on. In the detailed view, they can even be coloured with a choice of 24 colours.

Complete ready-to-install package

After that, all of the image designs can then be ordered as a complete installation set, including all of the necessary

components and accessories, directly via the app. Melos will supply each customised order as a complete ready-to-install package. Detailed blueprints guarantee uncomplicated installation whilst the practical realisation of the design should progress smoothly.

The Stylemaker® is scheduled to be available for downloading in time for the start of the 2018 season.

Servicing customers for 80 years

Melos GmbH is a leading manufacturer of plastics for sport and leisure floorings. The German company uses its know-how to develop customised solutions for a wide variety of plastics applications including the cable industry and other sectors. Based in Melle near Osnabrück, Melos employs more than 200 employees. As part of an international group, it has been supporting customers around the world with development expertise, products and services for more than 80 years.
