

MAINTENANCE

RELEASE 2020

passion for sports grounds

OVERVIEW ROUTINE MAINTENANCE

Soft ground driven rotary brushes and adjustable sieves are the features of the Routine Maintenance equipment range. Picked up infill material is cleaned from debris and is returned evenly. A constant amount of infill material in the sieve tray is the keypoint of the redistribution process and ensures a perfectly levelled pitch.

ATTENTION:

Beside the usage of the Routine Maintenance equipment it is highly recommended to contact your installer or service contractor for the Advanced Maintenance.

ROUTINE MAINTENANCE

TurfCare TCA1400 / TurfBoy TB1 / TurfTuner TT1600

Inspection of Lines/Seams

Top Cleaning of the Surface

Levelling/Redistribution of the Infill

Brushing of the Fibre

ADVANCED MAINTENANCE

SportChamp-Series / TurfKing-Series / TurfBoy TB2 / TurfSoft TS2 + TS3

Decompacting

Retopping

Deep Cleaning/Vacuuming

Seasonal Maintenance

Treatment against moss

High pressure water

OVERVIEW ROUTINE AND ADVANCED MAINTENANCE

Powered rotary brushes, adjustable sieves and vacuum turbines are the features of the Advanced Maintenance equipment range. Picked up infill material is cleaned from dust and debris and is returned evenly. Besides the redistribution and the levelling of the infill, decompacting and retopping with manual or attached spreaders complete the program.

SportChamp

SC3D4HL

Multifunctional ride-on machine for the advanced maintenance of artificial turf.

The new SportChamp SC3D4HL offers a wide range of tasks for maintaining different synthetic sports surfaces in sports facilities. By the use of different attachments all synthetic sport surfaces can be cleaned and maintained according to the manufacturer's guidelines and beyond that for an efficient and economic upkeep of the surface.

The operating principle of the SportChamp SC3 has not changed:

In a single operation, SportChamp levels the infill material of filled surfaces with its steerable, low-wear brush and eliminates contamination at the same time. Thus the infill material will be loosened and the fibre will be put upright again. Impurities will be vacuumed into a large-volume filter box during the surface maintenance. The robust filter unit with high pulling power is controlled automatically and cleaned within minutes. Since the filter box opens for emptying automatically, you must no longer remove it for emptying.

With its effective working width of 1,100 mm, and the wide range of attachments, SC3D4HL will facilitate and accelerate all necessary care tasks.

Art.-No. 8800090

Drive	3-cylinder diesel engine, water-cooled, 22 HP
Traction drive	Hydrostatic, speed up to 10 km/h Hydraulic lifting device for accessory attachments and filter box; Differential lock
Capacity of tank	approx. 30 litres
Brush working width	depending on brush: 900 - 1,600 mm
Weight	from approx. 680 kg
Dimensions	L 2,800 x W 1,320 x H 1,283 mm

Subject to technical alterations

NEW EQUIPMENT.

Filter box with larger capacity, automatically cleaning filter and self closing tailgate.

EASY HANDLING.

Controls and EcoBoost Drive, clearly arranged for intuitive handling.

REFUELLING.

Filler neck outside for 30 liter fuel tank

SportChamp fitted with optional attachments

SportChamp

SC2D/SC2BL

Multifunctional ride-on machine for the advanced maintenance of artificial turf

The SportChamp, the leading machine in the world market, is the solution for the maintenance of different synthetic sport surfaces within a sports facility. By the use of different attachments all synthetic sport surfaces can be cleaned and maintained according to the manufacturer's instructions and beyond that for an efficient and economic upkeep of the surface.

During weekly use, the SportChamp levels the infill material of filled surfaces with the rotary brush and eliminates contamination at the same time. Thus the infill material will be loosened and the fibre will be put upright again.

Fibres lying loosely on the turf and even well-rehearsed fine dirt will be vacuumed in a large-volume filter box during the surface maintenance by the proven extraction system. The filter unit is controlled automatically and cleaned within minutes. It will be evacuated - controlled hydraulically - quite conveniently while sitting on the driver seat.

Numerous attachments facilitate and expedite the necessary maintenance tasks. The range includes attachments for the winter services and the refilling of infill material, for the removal of leaves, the loosening of extreme compaction and the spraying of care products. The application area of the SportChamp is enlarged by additional attachments for non-infilled artificial turf, synthetic sports surfaces or sidewalks. Thereby it is the multifunctional care and maintenance machine for your sports facility.

Beside the classic, weekly maintenance tasks the SMG SportChamp can additionally carry out the annual basic and deep cleaning.

Art.-No. 8800071

Drive	3-cylinder diesel engine, water-cooled, 16.1 kW (22 HP)
Traction drive	Hydrostatic, speed up to 10 km/h Hydraulic lifting device for accessory attachments and filter box; Differential lock
Capacity of tank	approx. 17 litres

SportChamp

SC2BL/E

Ride-on machine for the cleaning and care of artificial turf.

Fully artificial grass surfaces and synthetic surfaces, like athletics tracks, need regular cleaning and maintenance so that they retain their high standard for sporting activities. SportChamp SC2BL/E is an ideal partner for protecting sports grounds.

Only the SportChamp SC2BL/E is capable of cleaning and maintaining artificial grass surfaces so thoroughly and carefully. Dust, ball felt and other loose particles of dirt are brushed up without damaging the carpet pile and picked up and deposited in the large filter box by the powerful suction turbine where the filter cleanly separates them from the surrounding air. Dirt particles are very easily removed from the surface of the carpet covering as well as from deeper layers.

Rotating brushes ensure an exemplary degree of cleanliness and straighten out the carpet fibres, which are subjected to exceptionally hard wear, in an extraordinarily short time. SportChamp SC2BL/E, with its hydrostatic drive cleans and maintains in one pass, and this is precisely why the performance of this machine is so outstanding.

Cleaning a hockey field with the SportChamp SC2BL/E takes less than an hour. With the front-mounted brushes you get into every corner so that the whole pitch is clean, while the hydraulic side brushes move the dirt away along suchobstructions as pitch-side boarding and rainwater channels and effectively disposes of it.

WashMatic

WM800

Ride-on machine for the cleaning of synthetic sports surfaces by high pressure water.

The WashMatic is powered by a 25 hp water-cooled diesel engine. The front attachment cleans synthetic sports surfaces, e.g. nonfilled artificial grass, jogging tracks, multi-purpose playing fields or similar surfaces by high pressure water. The spray pressure can be adjusted. The rotating spray lance works with up to 140 bar. The water requirement per minute is 50 liters and is usually provided by the water supply of the sports facility. If the required amount of water is not available, the 300 liter water tank with integrated overflow valve can be used as a water buffer. In this case, an external water pump requests the fresh water from the intermediate tank to the machine. The dirty water is discharged via a drain hose. The working width of the WM800 is 800 mm; 200 - 250 m² can be cleaned per hour. The 300 liter water tank, external pump and hoses are placed on a compact trolley. This can be easily lowered by a electric winch over the ramp and positioned as needed.

Art.-No. 6232505

Drive	25 hp water-cooled diesel engine
Water pressure	up to 140 bar
Working width	800 mm
Area performance	200 - 250 m ² /hour
Weight	1,600 kg
Dimensions	L 3,700 x W 1,300 x H 2,350 mm

EASY HANDLING.
Controls and EcoBoost Drive, clearly arranged for intuitive handling.

PRECISE.
Front attachment with rotating spray lance, manometer and valve to adjust spray pressure.

INDIVIDUAL.
Ramp with winch for trolley with 300 litre intermediate tank, water pump and 2x 75 mtr. hoses.

TurfBoy

TB2/TB2T

Ride-on machines for the cleaning and care of infilled (TB2) or non-infilled (TB2T) artificial turf.

TurfBoy TB2 is driven by a 16 HP air-cooled petrol engine. Due to its very compact design the machine is ideal for the work on sand infilled tennis courts or sand/rubber infilled pitches such as futsal courts. The working depth of the rotary brush can be adjusted via two spindles. The vibrating screen can be precisely adjusted, with variable settings from 4 to 10 mm, depending and in accordance with the condition of the infill material. You can easily clean the filter by turning the handwheel.

The brush housing and the drag brush row at the rear of TurfBoy TB2 can be lifted from the driver position. The drag brush stands on the left-hand side of the machine is overlapping it by 20 cm. Such positioning makes it possible to reach edges and corners. Due to the detachable trailing brush row, the TurfBoy TB2 can pass even doors of 1 metre width.

Art.-No. 6400161 (TB2) / Art.-No. 6212217 (TB2T)

Drive	2-cylinder petrol engine, air-cooled / 11.8 kW (16 HP)
Traction drive	hydrostatic, driving speed up to 9 km/h
Working width	900 mm
Weight	310 kg

BS800

Art.-No. 6221306

DB1600

Art.-No. 6211805

TurfBoy

TB1

Ride-on machine for the care of artificial turf.

TurfBoy TB1 is driven by a 1-cylinder 16 HP air-cooled petrol engine. The ground-driven rotary brush eliminates suspended particles, abrasion and dirt particles from the top surfaces. Its working width is 700 mm.

The vibrating screen can be precisely adjusted, with variable settings from 4 to 10 mm, depending and in accordance with the condition of the infill material.

The now cleaned infill material will be dosed and returned to the system as well as the fibre will be put upright again.

TurfBoy TB1 is equipped with a fold-out drag brush and a hitch to pull additional attachments like triangular brush DB1600, TurfCare TCA1400 or a ground-driven spreader. TurfBoy TB1 is equipped with a rake and a perforated shovel for infill to clean the edges.

Art.-No. 6400285

Drive	1-cylinder petrol engine, air-cooled / 11.4 kW (16 HP)
Traction drive	hydrostatic, driving speed up to 9 km/h

TurfKing

TK1100/TK1502

Tractor device for the cleaning and care of artificial turf.

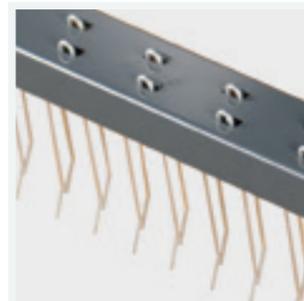

TurfKing TK1502 brush and vacuum system guarantees clean sports surfaces and optimum playing conditions. Conventional brush rows and/or drag mats are not suitable for thorough cleaning of floor coverings/deep cleaning and loosening of sand-filled and/or rubber-filled artificial turf. The 3-point rear-mount type accessory for compact tractors goes with any type of tractors with a power of at least 20 to 25 HP and combines all important basic functions in one machine. The device is compact and easy to connect.

With the TurfKing, the required working depth can be precisely set via adjusting spindles - for all work operations, so that each individual function can be separately adjusted and carried out to suit the corresponding turf conditions. The polyester filter cartridges that are used are designed for long-lasting use and are de-dusted continuously.

Art.-No. 6400136 (TK1100) / Art.-No. 6400148 (TK1502)

Working width	TK1100 = 1,100mm TK1502 = 1,500mm
Drive	PTO adaptor 540 rpm
Weight	TK1100 = 225 kg TK1502 = 270 kg
Dimensions	TK1100: L 950 x B 1,300 x H 830 mm TK1502: L 950 x B 1,700 x H 830 mm

Subject to technical alterations

GENTLY.
Working width of the steel tines are adjustable for gently loosening of the infilling material (optional).

SELF-CLEANING.
Permanent filter with continuous de-dusting of filtered suspended particles and fine dust.

COMPACT.
Dirt tub and drag brush.

TurfCare

TCA1400

Ground driven, tow-behind device for the cleaning and care of artificial turf.

TurfCare TCA1400 maintains any kind of infilled synthetic turf pitches. The wheel drive makes the equipment independent from any hydraulic or power shaft drives. Therefore the TurfCare can be pulled by various vehicles such as small compact tractors or quads.

The working depth can be precisely set and locked via two adjusting spindles.

The vibrating screen can be precisely adjusted with variable settings from 4 - 10 mm depending on the degree of pollution and the grid size of the infilling material.

For the pass of narrow doorways the two transport rollers can be fold out and the tow bar can be raised up.

Art.-No. 6400160

Working width	1,400 mm
Weight	170 kg
Dimensions	L 1,300 x W 1,800 x H 510 mm

Subject to technical alterations

SMOOTH ADJUSTABLE.
Vibrator sieve adjustable from 4 - 10 mm, cleans dirt out of the infill material with simultaneous repatriation.

TINES.
Working width of the steel tines are adjustable for gently loosening of the infilling material.

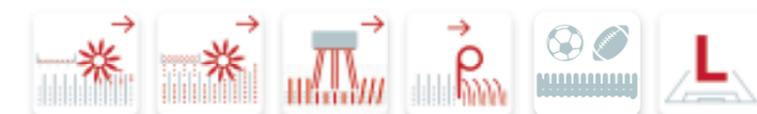

ONE OF A KIND.
Fold-out transport rollers for transverse drive through doors and tight gates.

COVER SHEET (OPTIONAL)

Weatherproof PVC cover sheet for the year-round outdoor storage of the TurfCare on/next to the Field.
Art.-No. 6226899

TurfCare

TCA500

Ground driven, tow-behind devices for the cleaning and care of artificial turf.

TurfCare TCA500/2000 maintains any kind of infilled synthetic turf pitches. The wheel drive makes the equipment independent from any hydraulic or power shaft drives. Therefore the TurfCare can be pulled by various vehicles such as small compact tractors or quads.

The working depth can be precisely set and locked via two adjusting spindles.

The vibrating screen can be precisely adjusted with variable settings from 4 - 10 mm depending on the degree of pollution and the grid size of the infilling material.

For the pass of narrow doorways the two transport rollers can be fold out and the tow bar can be raised up.

TurfRouter

TR500

Autonomous mobile robot for the cleaning and care of artificial turf.

The TurfRouter is powered by 12V lead acid batteries; which allow a operating time of 3-4 hours. The max. Driving speed is 5 km/h. The charging time is 6 hours. For localization and navigation the TurfRouter is equipped with a field positioning technology processes information from the GPS/GNSS system and the gyroscope.

The safety concept includes ultrasonic sensors and a collision protection at the front of the TurfRouter. The operation is done either by hand or radio remote control. The communication for the exchange of all device / work data takes place via SIM card, Bluetooth or WLAN. Via an APP, these data can be read out with conventional devices and monitored.

At the rear of the TurfRouter is a 3-point hitch with electric cylinder and tow ball for pulling and lifting attachments, such as the established "bestseller" TurfCare, the "diamond-shaped" RigidBrush or a magnet bar. The TurfRouter works according to the SMG route for optimal maintenance and cleaning of artificial turf and needs about 3 hours for a full-sized football pitch.

Depending on the frequency of the artificial turf or the cleaning needs, other routes can be defined. Likewise, areas of the football field which are to be treated more or less frequently and the place for recharging the TurfRouter can be determined. The drive wheels can be unlocked without tools; therefore a manual pushing of the device is easily possible. All attachments of the TurfRouter can also be towed by other vehicles such as small tractors or quads. Thereby, e.g. several maintenance steps can be made simultaneously.

Art.-No. 6231886

TurfSoft

TS2/TS3

Machines for the cleaning and care of artificial turf.

TurfSoft TS2 is a solution as simple as effective for the joy in the game and maintaining the value of small areas with infilled surfaces (sand and sand/rubber). Using this machine you can eliminate suspended particles, abrasion and dirt particles from the top surfaces. The manoeuvrable TurfSoft is ideal for areas with little space to move, where stairs, steps and narrow doorways complicate the access to the artificial turf pitches.

TurfSoft is equipped with a petrol engine which controls three functions at the same time: the vibrating function of the sieve, the drive of the turbine and the rotation of the cleaning brush. With light pressure on the steering arm the brush steps into the turf and through the emerging feed it causes an easy and energy-saving operation.

You can easily clean the filter by turning the handwheel.

SMOOTH ADJUSTABLE.
Vibrator sieve adjustable from 4 - 10 mm, cleans dirt out of the infill material with simultaneous repatriation.

COMPACT.
Foldable steering arm for easy transport and storing in small places.

ALL-TERRAIN.
Double wheelset for easy performance on all artificial turfs.

Art.-No. 6400050 (TS2) / Art.-No. 6400120 (TS3)

Drive	1-cylinder petrol engine / 3.2 kW (4 HP)
Filter box	permanent filter approx. 5 m ²
Working width	800 mm
Weight	approx. 85 kg
Dimensions	L 980 x W 750 x H 570 mm

Subject to technical alterations

TURFSOFT TS3

TurfSoft TS3 is developed for the cleaning of infilled artificial turf pitches along boards, fences or corner blocks. Equipped with a hinged side broom the TurfSoft TS3 eliminates the dirt even in areas which are difficult to access. If the side broom is not used, it can be easily folded.

CarpetWonder

CW95

Machine for the cleaning of indoor tennis court surfaces with rubber granules.

CarpetWonder is a multi-functional machine for cleaning, picking up granulate from around the playing area, ball abrasion and other dirt particles, such as small stones, and for returning the exact quantity of granulate back to the carpet. This is all done by this special machine in one process.

With its effective brush roller and an enormous working width, despite its compactness, the CarpetWonder is very easy to move and turn and therefore, far superior to other cleaning machines.

The silent operation allows tennis teams on the neighbouring court concentrate on their match without being disturbed.

Art.-No. 6400110

Drive	AC-current engine 1.5 kW (2 HP) / 230 V / 9 A with safety switch
Area performance	approx. 600 m ² /h
Filter	Permanent filter approx. 10 m ²
Weight	120 kg
Dimensions	L 1,180 x W 900 x H 1,100 mm

Subject to technical alterations

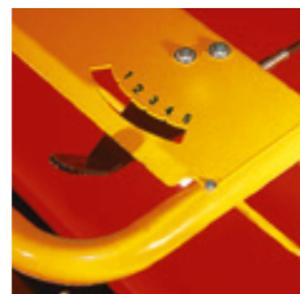

VIBRATING SIEVE.

The vibrating sieve separates dirt from the infill material with simultaneous repatriation and exhausts dust particles.

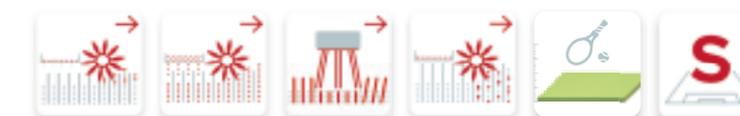

WORKING WIDTH.

Working width 700 mm for area performance up to 600 m²/h.

PRECISE.

The quantity of granules strewn can be accurately controlled by the adjustable speed of the vibrating screen.

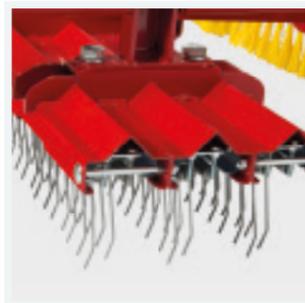

TurfTuner

TT1600

Tow-behind device for loosening and brushing of artificial turf.

3-point rear-mount type accessory with variable hitches fits all commercially available utility tractors. It is used for loosening of infilled artificial turf and to straighten the fibres. The infill material is equalized with the trailing drag brush.

The working width is 1,600 mm, the working depth can be precisely regulated by two adjustment spindles. The tines can be replaced on request / if necessary by rows of brushes.

GENTLY.

6 rows of steel tines, working width precisely adjustable for gently and efficiently loosening of the infilling material.

STEADY.

Hand wheel with adjustment spindle lock mechanism for adjusting the working depth.

EASY TRANSPORTATION.

Trailing drag brush, can be folded.

Art.-No. 6215153

Working width	1,600 mm
Weight	135 kg
Dimensions	L 1,750 x W 1,850 x H 280 mm

Subject to technical alterations

Triangle brush

DB1600

Triangle brush for artificial turf.

Triangle brush for evenly levelled surfaces of filled artificial turf. Tow bar with removable draw bars and four transport rollers make the handling easy.

MOBILITY.

Easy transportation through transport rollers on both sides.

Art.-No. 6211805

Working width	1,800 mm
Weight	39 kg
Dimensions	L 1,750 x W 1,850 x H 280 mm
