Mixing / MixMatic M2402

passion for sports grounds

Mixing / MixMatic M2402

Batch mixer for binder, rubber granules and gravel.

Option: charging vat

In comparison with the MixMatic M1202, extremely robust and large M2402 offers double mixing capacity and therefore is the rational solution for the instances when the quantity of mixed material needs to be increased to cover larger areas or to accomplish higher installation levels - for example, when installing medium to large sports or industrial surfaces.

The MixMatic M2402 is also characterized by the same positive characteristics as M1202 model: the low filling height and strong lifting hydraulics also in this dimension for easier loading and emptying, as well as for accelerated, intensive mixing of the material.
